Student Signature Page

My signature verifies I have read the IU South Bend Radiography Program Clinical Student Handbook (Revised August 2023) in its entirety and agree to abide by the policies and tenets described in the handbook and online. I know that these policies are subject to change; therefore, I will retain my copy of the handbook for future reference to reconcile any written notification of such changes. Changes in program policy will be announced to all students in writing prior to implementation. I realize that any change(s) may result in the revision of the degree requirements.

I am aware and understand that my failure to uphold these principles can result in disciplinary action including my dismissal from the IU South Bend Radiography Program.

Chapter 1: Introduction

Introduction

Welcome to the Associate of Science in the Radiography Program at Indiana University South Bend. The Radiography Program is part of the Vera Z. Dwyer College of Health Sciences, School of Applied Health Sciences. We are pleased you have chosen to pursue your degree in radiography with us! The faculty and staff look forward to working with you and wish you much success in the pursuit of your educational goals. To help you successfully achieve your goals we have put together this handbook of program policies and procedures.

These policies and procedures outline what is needed to successfully progress through the Radiography Program. Student radiographers are responsible for all information in this handbook and should become familiar with its contents. The handbook should serve as a reference during your time in the program.

This handbook has been constructed as a supplement to the Indiana University Code of Students Rights, Responsibilities and Conduct and serves to bridge the overriding policies of the university with the policies of the AS in Radiography program. The policies in this handbook are designed to support the success of the student and to serve as a guide and a reference for students enrolled in the AS in Radiography program. Please note that where the policy of a School/Program is more restrictive, students are held to the more restrictive policy.

A copy of Indiana University Code of Student Rights, Responsibilities, and Conduct is provided to each student upon acceptance to the university and can be located at the IU website at: http://studentcode.iu.edu/.

The IU South Bend AS in Radiography Program is fully accredited by the:

Joint Review Committee on Education in Radiologic Technology (JRCERT).
20 North Wacker Drive, Suite 2850
Chicago, Illinois 60606-3182 https://www.jrcert.org/

Accreditation by the JRCERT is a voluntary process and all programs in radiography and medical imaging can seek accreditation. The JRCERT promotes excellence in education and enhances the quality and safety of patient care through accreditation of educational programs in medical imaging. The JRCERT is currently the only agency recognized by the United States Department of Education for the accreditation of educational programs in radiography and medical imaging.
Program Description

The Radiography Program is an educational program, sponsored by Indiana University South Bend. The program is designed to prepare students as competent, professional radiologic technologists within the regionally served area.

The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). The American Medical Association (A.M.A.), the American Society of Radiologic Technologists (ASRT), the AEIRS (Association of Educators in Radiologic Technology), and the American College of Radiology (ACR) serve as collaborating agencies in the accreditation process.

Upon completion of the program, students receive an Associate of Science in Radiography Degree. Graduates are then eligible to take the national certifying examination given by the American Registry of Radiologic Technologists (A.R.R.T.).

The education of the student radiographer consists of didactic classes, clinical laboratories, and clinical field experience. Each student will be assigned to a clinical agency for the duration of the program. This will be considered the student’s primary or home clinical site. During clinical experience, the student rotates through a variety of clinical areas in imaging departments and is required to complete the affiliate clinic rotations at the clinical education sites during the 22-month clinical/professional program. The student becomes part of the hospital health care team and performs clinically under the direction of the radiologists, with the assistance of a staff of registered radiologic technologists.

Statement of JRCERT Compliance

The Indiana University South Bend Radiography program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT). The radiography program strives to make every possible attempt to comply with all Standards established by JRCERT. To review a copy of these Standards please go to [Accreditation Standards - 2021 - JRCERT: Joint Review Committee on Education in Radiologic Technology](#).

The program assures that students and faculty are cognizant of the Standards and must provide contact information for the JRCERT. Any individual associated with the program has the right to submit allegations against a JRCERT accredited program if there is reason to believe that the program has acted contrary to JRCERT accreditation standards and/or JRCERT policies. Additionally, an individual has the right to submit allegations against the program if the student believes that conditions at the program appear to jeopardize the quality of instruction or the general welfare of its students.

If at any time during their clinical professional education a student feels that the program is not in compliance with JRCERT Standards, the individual must first attempt to resolve the complaint directly with program/institution by following the due process or grievance procedures provided by the program/institution. Written grievances should follow the Student Appeal Policy found on the IUSB Radiography Program Policy Website.

If the complaint cannot be resolved or the individual believes that the concerns have not been properly addressed, they may submit allegations of non-compliance to the JRCERT. Students should contact the JRCERT by (1) mail: 20 North Wacker Drive, Suite 2850, Chicago, IL 60606-3182; (2) phone: (312) 704-5304; (3) fax: (312) 704-5304 or (4) email: mail@jrcert.org. Any complaint found to have merit by the JRCERT will be addressed and corrected to the satisfaction of the JRCERT.

Contacting the JRCERT must not be a step in the formal institutional or program grievance policy/procedure. The individual must first attempt to resolve the complaint directly with institutional/program officials by following the grievance policy/procedures provided by the institution/program. If the individual is unable to resolve the complaint with institutional/program officials or believes that the concerns have not been properly addressed, the individual may submit allegations of noncompliance directly to the JRCERT.
Philosophy of the Program in Radiologic Technology
The program is based on the belief that the student radiographer should experience as many forms of educational opportunity as possible in both the didactic and clinical setting as part of their student learning environment. In today’s dynamic healthcare field, the student needs to be given the necessary skills to adapt to constant change. It is our belief that general education course work in English composition, mathematics, human anatomy and physiology, public speaking, and medical terminology will enhance the abilities of the graduate technologist while the attainment of the associate degree will elevate their professional status.

The program functions in partnership with the University and the medical facilities within the regionally served community. One part of this partnership involves on-site clinical education sites for our students. The second part involves the responsibility of the Radiography Program to provide the community with clinically competent graduate radiographers who will model proper professional behaviors. The students, the community, and the University benefit in an environment of trust and cooperation between all involved parties.

Mission and Goals of the Program in Radiologic Technology
Mission Statement:

The Radiography Program at Indiana University South Bend is committed to serving north-central Indiana and south-west Michigan through the operation of excellence in teaching and learning. The mission of the Radiography Program is to create professional and knowledgeable technologists through a comprehensive education in Radiography. The goals of the Radiography Program are to promote the effectiveness of radiographic skills needed for employment, sound patient care, effective communication, and strong ethical judgement. Through continuous improvement, we will serve our community by educating students with a strong work ethic and values.
Program Goals

1. The student will graduate clinically competent.
2. The student will be able to effectively communicate.
3. The student will develop and apply effective critical thinking skills.
4. The student will develop lifelong learning.

Student Learning Outcomes

Student Learning Outcome 1:
   The student will obtain and assess radiographs of acceptable diagnostic quality.
   The student will apply the principles of radiation safety.
   The student will deliver effective patient care to a diverse population.

Student Learning Outcome 2:
   The student will communicate effectively as a part of the healthcare team.
   The student will communicate effectively in writing.

Student Learning Outcome 3:
   The student will be able to adapt radiographic procedures for non-routine situations.
   The student will critique images for diagnostic quality and devise necessary factors for quality improvement.

Student Learning Outcome 4:
   Students will determine the importance of continued professional development.
   Students will attend a radiology conference.

Professional Registration and Indiana State Licensure

A. Professional Registration
Graduates of the Radiography program who meet the required clinical standards are eligible to apply to sit for the national certification examination administered by the American Registry of Radiologic Technologists (ARRT). Successful completion of the ARRT examination earns the initial certification to practice as a Registered Technologist, R.T. (R). Renewal is required annually. Certified RTs have continuing education requirements mandated by the ARRT. For further information regarding registration, certification, continuing education and the Continuing Qualification Requirements (CQR) process, please contact the American Registry of Radiologic Technologists

(ARRT): American Registry of Radiologic Technologists
1255 Northland Drive
St. Paul, MN 55120-1155
(651) 687-0048
www.arrt.org
B. State Licensure/Indiana Licensure

State Licensure

Most states require that individuals who operate radiographic equipment be approved by the state in which they are working. For information regarding specific state requirements outside of Indiana, please contact the appropriate state agency. A list of state contacts can be found at the ASRT’s Legislation, Regulation and Advocacy webpage (https://www.asrt.org/main/standards-and-regulations/legislation-regulations-and-advocacy/individual-state-licensure).

Indiana Licensure

The state of Indiana requires that anyone operating radiographic equipment be approved by the State. Students in an approved radiography program are required to obtain an Indiana State Permit that remains valid until six (6) months after the graduation date. The application process for a student permit is initiated by the IU South Bend Radiography for students who have been admitted to the Professional Program. Upon graduation and successful completion of the ARRT examination, the graduate will be eligible for Indiana State Licensure. For further information regarding Indiana state licensure, please talk with a faculty member or contact:

Indiana State Department of Health

Division of Medical Radiology Services
2 North Meridian Street, 4 Selig
Indianapolis IN 46204
(317) 233-1325 (ISDH Main Switchboard)
Email: MedicalRadiology@isdh.in.gov
http://www.in.gov/isdh/23279.htm
AS in Radiography Program Statements

Upon completion of the program, the graduate will be able to demonstrate the ability to:

1. Function as a clinically competent diagnostic radiographer.
2. Demonstrate professional behaviors in accordance with the American Registry of Radiologic Technologists (ARRT) Standards of Ethics during their practice of diagnostic radiography.
3. Employ critical thinking and problem-solving skills that will enhance their procedural capabilities during the performance of radiographic examinations.
4. Demonstrate effective verbal and written communication skills in their interactions with patients, physicians, peers, and other members of the health care team.
5. Successfully complete and pass the American Registry of Radiologic Technologists (ARRT) certification examination on their first attempt.
6. Apply knowledge of the principles of radiation protection according to ALARA standards to the patient, oneself, and others.
7. Apply knowledge of anatomy, positioning, and radiographic techniques to accurately demonstrate anatomical instructions on a radiograph.
8. Select appropriate exposure factors to achieve optimum radiographic technique with a minimum radiation dosage to the patient.
9. Examine radiographs to evaluate exposure factors, patient positioning, and overall diagnostic quality.
10. Exercise discretion and sound judgment while providing compassionate patient care during the performance of diagnostic radiographic procedures.
11. Recognize emergency patient conditions and initiate lifesaving first aid.
12. Recognize the importance of continued education and active membership in professional organizations for personal development and professional growth.
Division of Radiologic Sciences  
Program Organizations and Committees Relevant to Student Success

Radiologic Sciences Assessment Committee  
The Assessment Committee in the Division of Radiologic Sciences is a standing committee of the Radiologic Sciences Faculty. The members are comprised of two to three faculty members and a student representative. The purpose of the committee is to oversee the evaluation of the radiography program with a goal of improving the program and student outcomes. To carry out these purposes, the committee plans, evaluates, and revises assessment activities and reports the results to the faculty, administration, the advisory board, and other interested parties.

Several of the activities included in the evaluation plan rely on student input. Examples of such activities include:
- Clinical evaluations
- Skill assessments
- Graduate exit survey
- Random collection of selected student work
- Course evaluation data
- One-Year Post-Graduate Survey

Each of these activities evaluates student data as an aggregate and not as individuals. Students are not asked to identify themselves on any survey. It is essential that students take these assessment activities very seriously. Student input is invaluable in our efforts to improve our program.

Since the assessment plan does undergo revision, the plan may change. However, the purpose of the activities remains the same, as does the committee interest in a “big” picture and not the evaluation of an individual student or faculty. Students who have concerns about the assessment process may bring them to the attention of the Program Director. The committee meets every fall semester.

Course Instructor Evaluations  
Students are invited and encouraged to complete course evaluations using the online Explorance Blue survey for each course enrolled in. This information is confidentially compiled, reported, and the feedback collected is used to improve course instruction. Student participation is highly valued and appreciated.

Academic Advising Center, College of Health Sciences  
The Advising Center is located in the administration building and via Zoom. Advisors are dedicated to assisting Dwyer college students. The advisors and staff are knowledgeable and skilled in their abilities to counsel students throughout their journey at IU South Bend. Whether it is a question regarding course planning, scholarship and financial assistance, or graduation process, the staff and advisors are available, able and willing to assist you.
Division of Radiologic Sciences Scholarships
The Division of Health Sciences is fortunate to have received monies from several generous donors to fund scholarships for our students. On the IU South Bend campus, the Vera Z. Dwyer Scholarship is available to students in all Dwyer College of Health Sciences programs. Additional scholarships include the Radiologist Scholarship and the Radiology, Incorporated Scholarship. Students must apply through the online application service, https://southbend.iu.edu/students/scholarships/index.html

Student advisors and faculty will attempt to e-mail students with announcements about scholarships. All students requesting scholarship monies must have a FAFSA on file at the Financial Aid office at IU South Bend.

IU South Bend Medical Imaging Club
Students enrolled in the radiography program are invited to participate in the Medical Imaging Club. The Medical Imaging Club is a voluntary organization for students enrolled in either the Radiography Program or the BS in Medical Imaging Technology Program. The purpose of the Medical Imaging Club is to invite fellow medical imaging students to come together as a group. The medical imaging club is also utilized for fund-raising and community outreach activities.

The Medical Imaging Club consists of a President, Vice President, and Treasurer.

Chapter 2: Policies

University, College of Health Sciences, and Radiography Program Academic Policies

All universities establish academic requirements that must be met before a degree is conferred. These regulations concern such things as curricula and courses, the requirements for majors and minors, and university procedures and policies. Each student is individually responsible for fulfilling them. Advisors and faculty are available to advise students on how to meet these requirements. If the requirements have not been satisfied, the degree will be withheld pending satisfactory fulfillment. For this reason, it is important for each student to be knowledgeable of all the requirements described in the University policies, IUSB Undergraduate Bulletin, Vera Z. Dwyer College of Health Sciences (CHS) Policies, the Division of Radiological Sciences Policies, Radiography Program Student Handbook, and course syllabi.

**Academic Regulations and Policies of Indiana University**
- Academic, faculty, and student policies

**Policies of the Vera Z. Dwyer College of Health Sciences**
- Policies from the Vera Z. Dwyer College of Health Science

**Policies of the Division of Radiological Sciences**
- Policies from the Division of Radiological Sciences

**Office of Student Affairs and Diversity**
- Academic Success Programs, Career Services, Financial Aid, Housing, Registrar, and Student Services

**The American Registry of Radiologic Technologists (ARRT) Standards of Ethics**

Professionalism: [ARRT Standards of Ethics](#)

Medical imaging professionals are guided by a standard of ethics as published by the American Registry of Radiologic Technologists (ARRT). These standards provide for the safety, protection and comfort of the patients and serves as a guide for ethical conduct to which imaging professionals should adhere.

The rules of Ethics are mandatory and enforceable policies of the profession, which establish minimally, accepted standards for the medical imaging profession. Students enrolled in the medical imaging programs should familiarize themselves with these Standards as they are a part of the evaluation process for the clinical experience course grade. Students are expected to adhere to the ARRT Code of Ethics.
Professional Conduct
The IU South Bend Radiography Program is committed to develop radiographers who will provide the highest quality of care to their patients. Students in the radiography program are expected to conduct themselves in a professional manner at all times. Students are representatives of the IU South Bend Radiography Program on the school campus, in clinical agencies, and in the community. Students will be accountable for their own behavior. Students must abide by the American Registry of Radiologic Technologist’s (ARRT’s) Standard of Ethics.

Students are to treat all individuals with respect. Students must understand that they are a student, and while they may be an adult, they must follow instructions without questioning the decision of the Technologist or Instructor. If students have any concerns, please contact the program director.

Students will be an integral part of the healthcare community. Radiology departments in clinical agencies are to provide the patient with diagnostic and/or interventional services and excellent care. To do this, everyone working in the department, including students, must keep in mind that everything that is said or done within the department can impact patient care.

During clinical rotations, lab on campus, and in the classroom, students are expected to follow the Radiography Program Handbook, Radiography Program Policies, the IU Student Code of Conduct, and course syllabi. Students are expected to know and follow the clinical sites rules and regulations.

Despite these expectations, some students may not always act in a professional manner while they might be identified as an IU South Bend Radiography student. Unprofessional behavior will be addressed immediately.

Professional Organizations
Students are invited and encouraged to join their local, and state professional organizations.

Students are required to purchase a two consecutive one year student membership with the Indiana Society of Radiologic Technologists (I.S.R.T.): www.isort.org throughout the program.

- Annual fall conference and Quiz Bowl
  - Students are required to attend the annual fall conference and quiz bowl
- Membership ($10.00 each year)

Students are required to purchase a membership with the American Society of Radiologic Technologists (ASRT) their junior and senior year.

- ASRT membership (students/$35.00 year) includes subscription to: Radiologic Technology and A.S.R.T. Scanner

Students are required to attend the Radiological Society of North America (RSNA)

- Annual fall conference in Chicago
  - Students are required to attend the annual fall conference and the Student Radiography Theater
- No cost to students except food, transportation, and lodging (if applicable)
National Credentialing Exam
American Registry of Radiologic Technologists (A.R.R.T): [www.arrt.org](http://www.arrt.org). The national certification examination given to graduates of approved programs. All graduates are eligible to take the examination and upon passing, will be certified registered technologists in radiography and may use the initials – R.T.(R). Application Fee: $225.00

Program Grading Scale
All courses in the Radiography Program utilize the following grading scale. An **attainment of at least a C, or 73%, is required to successfully pass a clinical & didactic course.** Grades will not be rounded in courses and extra credit is not allowed. For example, a grade of 72.9% is not rounded to 73% and results in a course failure. Likewise, a score of 89.9% is a B+ and not rounded to 90%. Failure to receive a final grade of “C” will require the student to retake the course.

The Radiography Grading Scale for didactic and clinical course work is:

<table>
<thead>
<tr>
<th>100-97 = A+</th>
<th>89-87 = B+</th>
<th>79-77 = C+</th>
<th>69-67 = D+</th>
<th>59 &amp; below = F</th>
</tr>
</thead>
<tbody>
<tr>
<td>96-93 = A</td>
<td>86-83 = B</td>
<td>76-73 = C</td>
<td>66-63 = D</td>
<td></td>
</tr>
<tr>
<td>92-90 = A-</td>
<td>82-80 = B-</td>
<td>72-70 = C-</td>
<td>62-60 = D-</td>
<td></td>
</tr>
</tbody>
</table>

The following grades are used in determining grade point averages throughout the program using the corresponding four (4) point system:

<table>
<thead>
<tr>
<th>A+ = 4.0</th>
<th>B+ = 3.3</th>
<th>C+ = 2.3</th>
<th>D+ = 1.3</th>
<th>F = 0</th>
</tr>
</thead>
<tbody>
<tr>
<td>A = 4.0</td>
<td>B = 3.0</td>
<td>C = 2.0</td>
<td>D = 1.0</td>
<td>I = Incomplete</td>
</tr>
<tr>
<td>A = 3.7</td>
<td>B- = 2.7</td>
<td>C- = 1.7</td>
<td>D- = 0.7</td>
<td></td>
</tr>
</tbody>
</table>

A satisfactory/fail system will be used for clinical grading. More information can be found at [https://students.iusb.edu/registrar/grades/satisfactory-failing-grades.html](https://students.iusb.edu/registrar/grades/satisfactory-failing-grades.html)

Calculating GPA
Your SIS transcript shows your semester and cumulative GPA. You can also use the GPA calculator found at: [https://students.iusb.edu/registrar/grades/index.html](https://students.iusb.edu/registrar/grades/index.html)

Grade Grievances
If a student disputes their final course grade, the student must discuss the matter with the faculty member assigning the grade. Further information regarding grade grievances can be found in the current IU South Bend Bulletin and Code of Student Rights, Responsibilities, and Conduct. Assistance may also be obtained from an Academic Advisor. More information can be found at [https://students.iusb.edu/registrar/grades/grievances.html](https://students.iusb.edu/registrar/grades/grievances.html)

Good Standing in the Radiography Program
To remain in good standing, a student must:

- Maintain a grade of C (2.0) or better in each required course.
- Maintain an overall CGPA of 2.0 or above.
- Ethics and behavior consistent with ARRT Standard of Ethics.
- Follow the required course sequence.
Students must achieve an overall average of 73% on all exams (content and final) within a didactic course to pass the course. This follows Policy R-23, Exam Policy.

Clinical Progression
In addition to the general academic policies, students must meet the following requirements to be promoted through the clinical course sequences. Students must pass all courses each semester to progress to the next semester.

If a student is unsuccessful in a course, they will meet with the Program Director. It is recommended that the student meet with the faculty member first.

The following didactic courses and clinical practicums must be taken together:

**AS Rad Fall Semester Junior Year**
- R100 Orientation to Radiologic Technology
- R101 Radiographic Procedures I
- R102 Principles of Radiography I
- R103 Intro to Clinical Radiography (8W1)
- R180 Radiographic Procedures Lab
- R181 Clinical Exp in Radiography I (8W2)

**AS Rad Spring Semester Junior Year**
- R180 Radiographic Procedures Lab
- R182 Clinical Experience in Radiography II
- R201 Radiographic Procedures II
- R208 Topics in Radiography - Ethics
- R250 Physics Applied to Radiography

**AS Rad Summer Semester Junior Year**
- R281 Clinical Experience in Radiography II
- R282 Clinical Experience in Radiography III

**AS Rad Fall Semester Senior Year**
- R200 Pathology
- R205 Radiographic Procedures III
- R260 Radiobiology and Protection
- R283 Clinical Experience in Radiography V

**AS Rad Spring Semester Senior Year**
- R207 Senior Capstone
- R208 Topics in Radiography – Image Analysis
- R202 Principles of Radiography II
- R290 Clinical Experience in Radiography VI
1. Students will be promoted to the R181 Clinical Experience in Radiography upon successful completion of: R103 Introduction to Clinical Radiography

2. Students will be promoted to R182 Clinical Experience in Radiography upon successful completion of:

   R100 Orientation to Radiologic Technology
   R101 Radiographic Procedures I
   R102 Principles of Radiography I
   R180 Radiographic Procedures Lab
   R181 Clinical Experience in Radiography

3. Students will be promoted to R281 Clinical Experience in Radiography upon successful completion of:

   R180 Radiographic Procedures Lab
   R182 Clinical Experience in Radiography
   R201 Radiographic Procedures II
   R208 Topics in Radiography - Ethics
   R250 Physics Applied to Radiography

4. Students will be promoted to R282 Clinical Experience in Radiography upon successful completion of: R281 Clinical Experience in Radiography

5. Students will be promoted to R283 Clinical Experience in Radiography upon successful completion of: R282 Clinical Experience in Radiography

6. Students will be promoted to R290 Comprehensive Experience in Radiography upon successful completion of:

   R205 Radiographic Procedures III
   R200 Pathology
   R260 Radiobiology and Protection
   R283 Clinical Experience in Radiography

**Notification of Improvement and Violations**

The IU South Bend Radiography Program follows Policy R-13, Notification of Improvement Policy to allow students the opportunity to be successful in the radiography program. When opportunities of improvement are noted by faculty, students will be given a notification of improvement through an Alert Form (written warning) or a Program Level Success Plan. An Alert Form or Program Level Success Plan can affect a course grade and progression in the program.

All courses allow the introduction, practice, and mastery of program curriculum. Students are expected to be accountable, exhibit professional behavior, communicate effectively, use critical thinking, and be in good standing with the program. Course Violations occur when students fail to follow course syllabi policy, handbook policy, and IU policies. The action taken by faculty depends on what is outlined in the course syllabus. Please see Policy R-24 for details and a list of violations.
Clinical and Lab are a critical part of the curriculum to become a radiographer. Students are expected to adhere to program policies, course objectives, course or program competencies, the Student Code of Conduct, or the ARRT Standard of Ethics. This can result in professionalism point deductions in Clinical or Lab. Clinical and lab violations occur when students fail to follow course syllabi policy and handbook policy. The action taken by faculty depends on what is outlined in the course syllabus. Please see Policy R-24 for details and a list of violations.

Behaviors and actions that can lead to automatic course failure or academic and disciplinary actions are part of the IU Student Code of Conduct. This includes Academic and Personal Misconduct. Students should familiarize themselves with this list because they are held accountable for their actions.

Violations may impact course grade and/or progression in the program.
Chapter 3: Clinical Information

Radiography and Medical Imaging Organizational Chart
The Radiography and Medical Imaging Program at IUSB is part of the Vera Z. Dwyer College of Health Sciences. Below is the organizational chart where the Radiography and Medical Imaging Program is housed in the College. Please see Appendix A for the organizational chart of the entire Vera Z. Dwyer College of Health Sciences.
Radiography Program Roles

Program Director

The program director is a full-time member of the faculty of the Division of Radiologic Sciences. The Division of Radiologic Sciences is housed in the College of Applied Health Sciences in the Vera Z. Dwyer College of Health Sciences at IU South Bend. The program director must hold the appropriate credentials with the American Registry of Radiologic Technology, the Indiana State Board of Health and must have earned a Master’s Degree.

Duties include:

- Teach didactic courses in the AS in Radiography and the BS in Medical Imaging Technology Programs
- Maintain current knowledge of the professional discipline and education methodologies through professional development
- Organize, administer and review program effectiveness
- Evaluate and review clinical education effectiveness
- Develop, organize, review and revise program curriculum in accordance with current ARRT Content Specifications
- Develop ongoing program evaluation through outcomes assessment
- Develop and revise course descriptions and course objectives
- Complete regular clinical site visits to review effectiveness and compliance with program policies
- Provide oversight and guidance for program faculty and staff
- Provide guidance and advising for prospective students and students enrolled in the medical imaging programs
- Engage in recruitment efforts for prospective students
- Demonstrate a positive attitude toward students, faculty and staff and promote an atmosphere of collaboration and mutual beneficence
- Organize and conduct faculty meetings with program faculty
- Oversee the program budget and contribute to the formulation of the budget
- Serve on department, college and university committees
- Engage in community service, service to the profession and service to the university
- Oversee fair and just enforcement of all program policies
- Maintain open lines of communication for faculty and student concerns
- Review radiation badges on a monthly basis
Clinical Coordinator
The clinical coordinator is a full-time member of the faculty of the Division of Radiologic Sciences at IU South Bend. The clinical coordinator teaches didactic classes, teaches labs, provides oversight for all affiliated clinical sites and serves as a liaison between the university and the clinical agencies. The clinical coordinator must hold the appropriate credentials with the American Registry of Radiologic Technology, the Indiana State Board of Health and have earned a bachelor’s degree.

Duties include:

- Teach didactic courses in the AS in Radiography Program
- Teach on-site clinical labs and conduct clinical skills validations
- Provide guidance and advising for student radiographers
- Maintain current knowledge of the professional discipline and education methodologies through professional development
- Evaluate the effectiveness of clinical education
- Serve as a liaison between the university and affiliated clinical agencies
- Coordinate clinical and didactic education
- Contribute to the development, implementation and evaluation of program goals and objectives
- Evaluate, revise and maintain program policies
- Evaluate and assure effectiveness of clinical education via regular clinical site visits
- Establish methods of evaluation to ensure student progress in the program
- Conduct regular meetings with clinical and program faculty to document students’ clinical progress
- Act as a student advocate and representative of Indiana University South Bend to ensure compliance with program and university policies
- Coordinate and maintain student records in a confidential manner
- Serve on department, college and university committees
- Engage in community service, service to the profession and service to the university
- Facilitate the assignment of clinical course grades
- Evaluate, revise and assure adherence to the clinical lab schedule
- Maintains a positive attitude toward students, faculty and staff and supports the mission of the program
- Maintain open lines of communication for clinical faculty, staff technologists, and student concerns
- Monitors student radiation badge exposure reports on a monthly basis
Clinical Preceptor
The clinical preceptor is a full-time employee of the affiliated clinical agency and functions as a liaison between the students assigned to that agency and the faculty at IU South Bend. The clinical preceptor provides oversight for student radiographers at the assigned clinical site with assistance from the clinical coordinator and assigns clinical course grades. Clinical preceptors have the ability to gauge student performance to help assist IU faculty to determine student performance. The clinical preceptor must hold the appropriate credentials with the American Registry of Radiologic Technology and the Indiana State Board of Health.

Duties include:

- Maintain current knowledge of the professional discipline and education methodologies through professional development
- Understand and adhere to program policies and procedures
- Assign clinical course grades and report course grades to the clinical coordinator
- Provide oversight and guidance for assigned student radiographers
- Evaluates students for clinical competency and assurance of clinical progress
- Conducts student conferences to discuss student progress at mid-term and at the end of each semester
- Routinely shares formative feedback to assure clinical progression
- Maintain open lines of communication for on-site staff technologists and student concerns
- Utilize the Trajeesys electronic record-keeping system
- Participate in program faculty meetings
- Supports the program and promotes its ideals and mission
- Complete ASRT Student Supervision module, one time
- Complete ASRT Clinical preceptor Academy modules, one time
- Complete evaluator test every 2 years
**Staff Technologists**

Staff technologists are employed by the affiliated clinical agency. Staff technologists provide oversight for student radiographers in assigned clinical rotations and perform student clinical competency evaluations which are reported via the Trajecsys electronic record-keeping system to ensure clinical progress. Staff technologists must hold the appropriate credentials with the American Registry of Radiologic Technology and the Indiana State Board of Health. In order to evaluate students for a competency or rotation evaluation, the technologist must be 1-year post registry or at the discretion of the clinical preceptor/clinical coordinator. Competency rechecks require a 5-year post registry or at the discretion of the clinical preceptor/clinical coordinator.

Duties include:

- Maintain current knowledge of the professional discipline
- Understand and adhere to program policies and procedures
- Support the program and promote its ideals and mission
- Participate in the evaluation of students in clinical rotations
- Evaluate students’ clinical competency and reports graded Clinical Competency Exams via the Trajecsys electronic record-keeping system
- Maintain direct & open communication with the clinical preceptor to assure students’ clinical progress
- Complete evaluator test every 2 years
- Complete ASRT Student Supervision module, one time

**Adjunct Instructor**

Adjunct faculty consists of appropriately qualified members of the medical imaging community who are contracted by the university to teach a specific clinical or didactic course for a designated period of time. It is recommended that adjunct faculty must hold the credentials equal to one-degree higher than the level at which they are teaching.

Duties include:

- Teach didactic/clinical courses in the AS in Radiography Program
- Provide guidance and advising for student radiographers assigned to the course
- Understand and adhere to program policies and procedures
- Support the program and promote its ideals and mission
- Understand and adhere to program policies and procedures
- Maintain current knowledge of the professional discipline and education methodologies through professional development
- Establish methods of evaluation to ensure student progress in the course
- Assign course grades and communicate grades to the program director
- Maintains a positive attitude toward students, faculty and staff and supports the mission of the program
Program Costs
A list of anticipated expenses outside of tuition and dorm or rent fees has been compiled for students to assist with financial planning. This list should not be viewed as all-inclusive, rather a guide to help in planning student-related expenses associated with the clinical professional program.

AS in Radiography estimated program costs can be found on the Radiography Program Website under costs.

Lead Markers
Each student radiographer is responsible for purchasing two sets of lead initial markers. Lead initial markers are used in clinic and must contain three letters (for example, ASG). Students should take care not to lose their lead markers and should always have both lead positional markers with them when in the clinical setting. The average cost for one set of markers is $28.00 ($60.00). These can be purchased at Techno-Aide.com, (Elite Style Marker Set with 3-Letter Initials).

If a student loses a marker, it is the responsibility of the student to purchase new markers immediately. The new set of markers must be identical to the originals and must be ordered from the same company. Students are not permitted to share markers in the clinical setting. The student must notify the clinical coordinator immediately if they lose a marker. If a student does not purchase markers within a few days of losing their markers, the student will receive an Alert Form.

Students must also use lead markers correctly and correctly label radiographic images. Failure to do so can result in inaccurate reports and can negatively impact patient care.

Malpractice Policy
Indiana University South Bend carries limited malpractice insurance for all students enrolled in the IUSB-CHS programs. The policy is in effect only during the time the student is engaged in scheduled clinical field experience and does not cover part-time employment or time spent in the clinical setting which is unrelated to IUSB student activities.

Student Records
Official transcripts can be obtained from the Office of the Registrar. For more information visit https://students.iusb.edu/registrar/transcript-requests.html

Records will be maintained by the following while the student is enrolled in the program:

- Items stored in Castlebranch include:
  - Immunizations
  - TB – At time of admittance (two-step) and annually (one-step)
  - Drug screening – Annual
  - Flu shot – Annual
- Items stored in Castlebranch include:
  - Background Check
  - Essential Abilities/Technical Standards (annual)
  - Requirement to Disclose Form (annual)
  - Proof of CPR – At time of admittance of program
  - Proof of Health Insurance - At time of admittance of program
• Indiana State Radiology Student Permit
• OSHA blood borne pathogens (annual)
• Child Abuse Recognition, Reporting and Prevention of Abuse Training (annual)
• HIPAA Mobile Devices Certification (annual)
• HIPAA Privacy & Security Certification (annual)
• Items collected during AHLT – R103 (Introduction to Clinical Experience) and stored in the Learning Management System (Canvas):
  o Clinical Student Handbook Signature (annual)
    ▪ This includes reviewing the radiographic repeat policy and the pregnancy policy
  o MRI Screening Form (annual)
• Radiation monitoring record – Maintained monthly and stored indefinitely within the department.
  o Monthly/yearly dosimeter reports and competencies are kept and stored within the office of the clinical coordinator and on a secure drive, indefinitely.
• Student competencies, performance evaluations, and time records – Maintained throughout the program and stored indefinitely.

If a student leaves the program, the above records will be kept on file.

The Program Director, the School Recorder, and the Assistant Dean for Student Success and Operations have administrative access to Castlebranch.

Students may request an opportunity to inspect their records in accordance to the “Federal Family Educational Rights and Privacy Act of 1974.” (FERPA). Please refer to this website https://students.iusb.edu/registrar/policies/ferpa.html for guidelines pertaining to FERPA records, student records, electronic data, and study academic records.

Program Graduation Requirements
In order to graduate, the student must:

• Receive a passing grade of C or above in all didactic and clinical courses
• Students must achieve an overall average of 73% on all exams (content and final) within a didactic course to pass the course. This follows Policy R-23, Exam Policy
• Have all clinical experience time completed
• Meet all University degree requirements
• Complete all required clinical rotations
• Complete all required clinical objectives for each clinical rotation
• Fulfill all clinical competency requirements of the Radiography Program in accordance with established professional standards
• Complete an application for graduation
• Turn in radiation badge

Employment Placement
The program will assist graduates in securing employment but does not guarantee placement upon graduation. Job openings and available educational programs will be communicated/posted through class email or the program’s Facebook page.
Chapter 4: Clinical Evaluations, Competencies and Schedules

Description of Clinical Experience
The Clinical Experience portion of the curriculum is arranged into six (6) clinical education courses. The clinical education courses are structured to complement didactic coursework. Fall and spring semesters consist of 8 to 16 weeks. Summer sessions consist of 6 weeks per semester. The program concludes at the end of the spring semester in the second year of the program. Time spent in the program is divided between didactic coursework, clinical laboratory instruction, and clinical experience. A student must successfully pass Clinical Experience with a grade of “C” or better or satisfactory to progress to the next semester.

The program will assure that clinical involvement for students is limited to not more than 10 hours per day.

If a student has unforeseen circumstances arise, they must communicate their situation with the clinical coordinators and the program director in the radiography and medical imaging program. Documentation may be requested.

Number of Clinical Placements
Each clinical site has a designated number of available spots called clinical placements. The number of clinical site placements is negotiated with each affiliated clinical agency for a specific period of time. Students enrolled in the clinical professional program are assigned to a primary clinical site for the 20-month duration of the clinical program. All students are provided access to each clinical site through scheduled clinical rotations.

Each student radiographer will be assigned to a specific clinical site for the duration of the program. This is considered the student’s primary clinical site. All students will rotate through each primary clinical facility. Additionally, students will have the opportunity to rotate through all affiliated clinical sites during the program. These clinical sites can be up to 50 miles from the University.

The program director may reassign a student radiographer to another primary clinical education site under the following conditions:

1. If, after a thorough assessment by program faculty, it is decided that a reassignment would be beneficial and in the best interest of the student.
2. A direct request for reassignment from the director of the affiliated clinical agency.

There are a total of 23 clinical spot placements. Elkhart General Hospital takes 5 students, Goshen Hospital takes 3 students, Memorial Hospital takes 8 students, St. Joesph Mishawaka takes 3 students, St. Joseph Plymouth takes 2 students, and Kosciusko Community Hospital takes 2 students.
First Year Clinical Experience
First year student radiographers attend clinical orientation at their assigned clinical site for a total of 15 hours spread out over 3 days. This occurs at the end of the first 8-weeks in the fall semester. Students attend clinical 2 days per week in the second 8 weeks of the fall semester. In the spring semester, students will attend clinical 2 days per week. Students are in the clinical setting observing, assisting and performing radiographic procedures. Clinical labs are conducted on campus. In the summer, students attend clinic 5 days per week, 8-hour days. Students will be required to travel to affiliated clinical sites to complete required affiliate clinical rotations. If accommodations are needed, the student will need to contact the program director. Affiliate rotations are scheduled by the Clinical Coordinator.

Second Year Clinical Experience
Second year student radiographers attend clinic at their assigned clinical site 3 days per week in the fall and 3 days per week in the spring semester. Students will be required to travel to affiliated clinical sites to complete required affiliate clinical rotations during the fall and spring semesters. Affiliate clinical rotations will be scheduled by the program Clinical Coordinator.

Both the first and second year students in the AS in Radiography Program follow the academic calendar established by IU South Bend which can be located on the campus website at Academic Calendars: Registrar: Student Affairs & Diversity: Indiana University South Bend (iusb.edu)

Explanation of Credit Hours
Didactic

In the Division of Radiography and Medical Imaging, one didactic credit hour is equal to 50 minutes of classroom instruction and a minimum of two hours of out of class work in a 15 week semester. A 3 credit hour course has 2.5 hours of classroom time and a minimum of 6 hours out of class work.

15-Week Semester
1 credit = 50 min in-class and 2 hours out of class
2 credits = 1 hours 40 min in class and 4 hours out of class
3 credits = 2 hour 30 min in class and 6 hours out of class

In an 8 week semester, one didactic credit hour is equal to 1 hour and 30 minutes of classroom instruction and a minimum of two hours of out of class work. A 3 credit hour course has 4.5 hours of classroom time and a minimum of 6 hours out of class work.

8-Week Semester
1 credit = 1 hour 30 min in class 2 hours out of class
2 credits = 3 hours in class and 4 hours out of class
3 credits = 4 hour 30 min in class and 6 hours out of class

Indiana University policy requires a minimum of 2,000 minutes of instructional activity for a three credit lecture class. More information can be found at https://vpfaa.indiana.edu/policies/bl-aca-h13-credit-hour-definition/index.html
Clinical Practicum

For every 80 hours spent in clinic, 1 credit hour is assigned (80:1).

Determination of Lab Grades

Radiography labs, course R180, are conducted during the fall and spring semesters during the student’s first year in the program. The labs are conducted on campus and taught by faculty. Clinical labs are structured to complement didactic course work and taught in a specific sequence. Students must demonstrate competency of at least 85% in the lab setting before attempting to perform any radiographic procedure on a patient in the clinical setting. Students must practice in lab or at clinical for at least one hour prior to the test out(s) in lab. If a student does not pass with at least an 85% in the lab, the student must practice the exam and perform the lab competency on a future date. The lab instructor will arrange this date.

Each lab competency will be documented using the Lab Competency Evaluation form in Trajecsys. For each exam, the student must obtain a minimum level of at least an 85%.

- If a student fails the initial lab competency, the original competency score is the student’s grade.
- If unable to master the exam, the student must review the positioning and technical factors of the failed exam.
- If a student fails a lab competency twice their score will be a zero. Competency must be achieved on all required ARRT imaging procedures.
  - A failed lab competency must be repeated during the same semester.
During the initial fall and spring semesters, the student will be evaluated by faculty utilizing the Lab Competency Evaluation form in Trajecsys. The student will demonstrate competency on exams taught in lab through simulation of the assigned radiographic exam. The student will be evaluated on fourteen different areas to demonstrate competency on the exam. Please see the Appendix B for the Lab Competency Evaluation Form and grading rubric.

Clinical and Lab Violations
The IU South Bend Radiography Program follows the Notification of Improvement policy to allow students the opportunity to be successful in the radiography program. When opportunities of improvement are noted by faculty, students will be given a notification of improvement through an Alert Form (written warning) or a Program Level Success Plan. An Alert Form or Program Level Success Plan can affect course grade and progression in program.

Clinical and Lab are a critical part of the curriculum to become a radiographer. Students are expected to adhere to all safety, professionalism, communication, ethics, critical thinking, and self-reflection rules and policies. This is outlined in the Clinical and Lab Violation mapping and points are deducted from clinical and lab depending on the frequency of offenses and the severity of offense.

Behaviors and actions that can lead to automatic course failure or academic and disciplinary actions are part of the IU Student Code of Conduct. This includes Academic and Personal Misconduct. Students should familiarize themselves with this list because they are held accountable for their actions.

Determination of Clinical Grades
During the clinical experience, students are graded on their clinical competency, performance, various assignments through Canvas, and professionalism. Below is a summary of each category in which the student’s grade is determined. The breakdown of each clinical course grade determination will be included in the course syllabus.

Student Performance Evaluations – Completed by Staff Technologists or Radiology Personnel
Students are evaluated during each clinical semester by staff technologists or radiology personnel in the clinical setting. The Performance Evaluation form for staff is located in Microsoft Teams through a QR code or link. Student Performance Evaluations completed by staff provides qualitative and quantitative feedback for students throughout their clinical semester, but are not part of their semester grade. Staff technologists will assess the student’s performance in 4 different categories, plus qualitative feedback. Staff Technologists must also verify that students followed the clinical repeat policy and the supervision policy. The Student Performance Evaluation can be viewed here. Students are not allowed to complete a Student Performance Evaluation on themselves or another student. Student Performance Evaluations completed by staff are used as resources for Clinical Preceptors when completing the Midterm and Final Evaluation, which is part of the student’s clinical grade. If students disagree with a QR code evaluation, they should first notify their clinical preceptor. If the issue is not resolved, the Clinical Coordinator/Program Director will then step in for assistance.

Student Performance Evaluations – Completed by Clinical Preceptors
The Clinical Preceptors will fill out an evaluation at mid-term and end of semester which is part of a student’s clinical grade in Trajecsys (Appendix C). Clinical preceptors use the feedback from the QR code evaluations from staff technologists to complete the mid-term and end of semester evaluation. Clinical Preceptors will assess the student’s performance in 13 different categories. During the summer
semester, only end of semester evaluation are completed by a clinical preceptor. The rotation evaluations are considered for mid-term and final evaluation grades from the Clinical preceptor.

If the student receives a failing mid-term or final Student Performance Evaluation from the Clinical Preceptor, the student will fail the clinical course and be out of progression in the radiography program. Failure is below 73%.

Assignments in Canvas
Students are evaluated on various topics throughout each clinical practicum. In a student’s junior year, a student binder is put together by the student to keep track of protocols, techniques, and hospital policies. Over the summer and in a student’s senior year, review modules are provided to prepare for the national registry through the ARRT. Self-assessments are completed after each clinical practicum in the program. One self-assessment will be completed for both summer sessions.

In addition to the evaluation is a list of Objectives and Performance Checklists specific to the rotational assignment. Objectives are placed online in Canvas and in Trajecsys for students to view. Each semester, students will complete a quick check in canvas in which they acknowledge their responsibility of clinical objectives. The student must also verify their rotation objectives, clinical supervision, and the repeat policy in Canvas after each clinical rotation. Failure to complete clinical rotation quizzes can adversely impact a student’s clinical grade and could result in a grade of “I” incomplete in the course which could delay progression to the next semester.

Each Student Performance Evaluation asks the technologist if direct clinical supervision for repeats was provided. If any repeats were taken, the technologist was directly supervising the exam. Along with the technologist adhering to the repeat policy, the student also acknowledges this policy in Canvas. These evaluations ensure the student and technologist were compliant of the direct supervision policy and the repeat policy.

Professionalism Points
All students receive 30 professionalism points each semester in clinical and in lab. Professionalism points are only good for one semester and do not roll over into the next semester.

A violation can affect professionalism points. A violation occurs when failure to adhere to program policies, course objectives, course or program competencies, the Student Code of Conduct, or the ARRT Standard of Ethics.

- The action taken by faculty depends on the violation and the frequency of offenses. This may impact course grade and/or progression in the program.
- An Alert Form will be implemented first before issuing point deductions unless the violation warrants a deduction in professionalism points as noted in the syllabi.
- Violations will continue forward during a students’ academic time in the program unless otherwise noted in the course syllabi.
- Students may receive more than 1 violation at a time.
- Actions and behaviors of students resulting in severe violations may result in immediate dismissal. The appropriate IU authorities will be notified.
• In some cases, the student may be asked to leave class, lab, or clinical setting and must report to the Program Director before returning to class, lab, or clinical. If the student refuses, security will be called to remove the student. This will result in immediate dismissal from the program.

Clinical Competencies

Clinical Competencies are requirements of the ARRT. Once competency on a radiographic procedure has been established in lab, and documented in the lab setting, the student can then perform exams on patients in the clinical setting. If prior lab competency has not been performed, the student will not practice/perform the exam on a patient in the clinical setting. These evaluations assess the student’s performance regarding completion of the program’s clinical competency system (see below). The student is evaluated in 21 areas when demonstrating competency. Please see Appendix D for complete Clinical Competency form. The Clinical Competency form is located in Trajecsys.

For surgical and fluoroscopy competency forms, please see Appendix E and Appendix F. On the surgical competency form, the student is evaluated in 17 areas. On the fluoroscopy competency form, the student is evaluated in 22 areas. The Surgical and Fluoroscopy Clinical Competencies are located in Trajecsys.

For arthrogram, cystography/cystourethrography, ERCP, HSG, and Myelogram competency forms, please see Appendix G. On these competency forms, the student is evaluated in 14 areas. These forms are located in Trajecsys.

Each semester the student is required to complete a specific number of competencies and rechecks for their clinical course grade. A total of 51 competencies and 7 rechecks are needed.

• Fall semester, junior year, 2 competencies are needed and no rechecks.
• Spring semester, junior year, 6 competencies are needed and 1 recheck.
• Summer semester I, junior to senior year, 10 competencies are needed and 1 recheck.
• Summer semester II, junior to senior year, 10 competencies are needed and 1 recheck.
• Fall semester, senior year, 11 competencies are needed and 2 rechecks.
• Spring semester, senior year, 12 competencies are needed and 2 rechecks.

By the end of the Radiography Program, students in the Class of 2024 and 2025 must complete a total of 36 mandatory competencies and 15 of the 35 elective competencies for a total of 51 competencies. Competencies must be performed on patients whenever possible.

Students from the Class of 2024 and 2025 should review all didactic and clinical competency requirements from the ARRT. Students may work ahead on competencies. Students must select an exam to perform from the list of Mandatory and/or Elective Procedures from the ARRT. All Clinical Competencies and Rechecks for each semester must be completed on or before the last day of the clinical experience. Clinical Competencies and Rechecks cannot be simulated.

• Students must complete all required competencies for each clinical course. Points in clinical courses are not calculated into the course grade until the completion of all competencies for that semester. Once all the competencies have been reached, the final course grade is calculated. If a student fails to achieve the required competencies, the student will receive an unsatisfactory as a grade and will be out of progression in the radiography program.
OR

- Students will receive an “I” incomplete in a course upon approval from the Program Director, which can be completed in the next semester. This is for extenuating circumstances only.

A Clinical Competency must be passed with a 90%* score to achieve competency. Each semester the student must meet the required competencies as part of their course grade.

*Even if a student is graded with a score above 90% and the grading technologist does not think the student is competent to complete the exam without direct assistance, the student will not pass the competency.

The ARRT didactic and clinical competency requirements are followed within the program curriculum which include general patient care requirements. For a list of the required general patient care requirements, please see Appendix H.
Clinical Competency Evaluation System Structure

Introduction

A Clinical Competency Evaluation System is a standardized method of evaluating the performance of students. The major portion of the system is structured for two types of evaluations (Initial Clinical Competency Evaluations and Recheck Clinical Competencies). A flowchart shows how a student can achieve clinical competency on radiographic procedures.
ARRT Statement on Didactic Competency Requirements

The purpose of the didactic competency requirements is to verify that individuals had the opportunity to develop fundamental knowledge, integrate theory into practice and hone affective and critical thinking skills required to demonstrate professional competence. Candidates must successfully complete coursework addressing the topics listed in the ARRT Content Specifications for the Radiography Examination. These topics would typically be covered in a nationally-recognized curriculum such as the ASRT Radiography Curriculum. Educational programs accredited by a mechanism acceptable to ARRT generally offer education and experience beyond the minimum requirements specified in the content specifications and clinical competency documents.

ARRT Statement on Clinical Competency Requirements

The purpose of the clinical competency requirements is to verify that individuals certified by the ARRT have demonstrated competence performing the clinical activities fundamental to a particular discipline. Competent performance of these fundamental activities, in conjunction with mastery of the cognitive knowledge and skills covered by the certification examination, provides the basis for the acquisition of the full range of procedures typically required in a variety of settings. Demonstration of clinical competence means that the candidate has performed the procedure independently, consistently, and effectively during the course of their formal education.

Steps towards Clinical Competency

The following are the areas of the Clinical Competency System (refer to Clinical Competency Flow Chart Summary):

1. Cognitive and Psychomotor (classroom and laboratory)

The student will learn examinations in the Radiographic Procedures classes. The clinical laboratory setting is for demonstration and practice of the examination learned in Radiographic Procedures. The student will be evaluated in the laboratory on each examination and must obtain a mastery of minimum 85%. Laboratory competencies do not count towards the student’s total clinical competency exams.

2. Clinical participation (clinical proficiency) consists of the observation, assistance, and performance phase of Clinical Experience. This area is where the student will perfect and expand their Clinical Experience. In clinical participation, the student will be evaluated at the end of each clinical rotation by the registered radiographer to whom they are assigned.

3. Clinical Competencies

Once the student has successfully completed the laboratory and clinical participation, the student is eligible to request a Clinical Competency in which they will demonstrate their skill and competency in that particular category of radiographic examinations.

Prior to initiating a clinical competency examination, the student must notify the staff technologist/clinical preceptor evaluation the exam of their intention to perform the clinical competency. Failure to state the intent prior to the start of the exam will invalidate the clinical competency exam.

Each clinical competency will be documented using the Clinical Competency Evaluation form in Trajecsys. For each exam, the student must obtain a minimum mastery level of at least a 90%.
• If a student fails the initial Clinical Competency, the original competency score is the student’s grade.
• If unable to master the exam, the student must review the positioning and technical factors of the failed exam.
• If a student fails a Clinical Competency twice, their score will be a zero. Competency must be achieved on all required ARRT imaging procedures.
  o A failed competency should be repeated if possible during the same semester.
• A failed competency that has not yet been retested on cannot constitute as a graded competency for that semester.

The student will be evaluated by the following point system for a Clinical Competency:

- 100% = Exceeds competency requirements
- 95% = Above average achievement in competency requirements
- 90% = Met minimum competency requirements
- Below 90% = Failure to meet minimum competency requirements

4. Clinical Competency Rechecks

All students should be aware that they will be evaluated (rechecks) by their clinical preceptor during each semester, to determine whether the student continues to perform competently in any prior successfully completed clinical competency. This competency recheck will be unannounced and unscheduled, and all students are required to participate in this recheck. This competency check will be figured into the student’s clinical experience grade.

The student will be evaluated by the following point system for a recheck clinical competency:

- 100% = Exceeds competency requirements
- 95% = Above average achievement in competency requirements
- 90% = Met minimum competency requirements
- Below 90% = Failure to meet minimum competency requirements

The student will be required to repeat the recheck in the same semester until competency is demonstrated. The same assessment format that is used to assess clinical competency will be used for recheck evaluations. Any clinical competency recheck that is failed must be repeated if possible during the same semester in which it occurs, unless circumstances dictate otherwise as determined by the Clinical preceptor. A recheck cannot be duplicated.

Each recheck will be documented using the Clinical Competency Evaluation form in Trajecsys. For each exam, the student must obtain a minimum mastery level of at least a 90%.

• If a student fails a recheck, the original recheck score is the student’s grade.
• If unable to master the exam, the student must review the positioning and technical factors of the failed exam.
• If a student fails a recheck twice their score will be a zero. Competency must be achieved on all required ARRT imaging procedures.
  o A failed recheck should be repeated if possible during the same semester.
• A failed recheck that has not yet been retested on cannot constitute as a graded competency for that semester.
Criteria for a Clinical Competency
Below is a description of each criteria in which the student is graded within the Clinical Competency Evaluation.

1. Room Preparation and Appearance
   • Have all necessary diagnostic equipment ready prior to exam (i.e. image receptors, grid, lead, markers, control panel, etc.)
   • Room is presentable and clean prior to patient entering the room

2. Verification of Patient I.D., Patient History and Requisition Evaluation
   • Ensures proper patient identifiers (name and date of birth)
   • Checks physician’s order/requisition for proper exam

3. Prepare patient and give clear, appropriate instructions
   • Ensure patient is properly gowned and ready for exam
   • Effectively communicates exam to patient

4. Demonstrates effective patient care skills (respect, privacy, comfort)
   • Conducts study in a professional, caring, and compassionate manner
   • Protects patient’s privacy and modesty
   • Provide for patient’s physical safety and comfort

5. Knowledge of procedure routines, necessary positions/projections
   • Performs the required projections (as per department) per procedure

6. Patient artifacts
   • All possible artifacts are removed which could compromise the diagnostic quality of the study. (i.e. glasses, hair pins, snaps on gowns, etc.)

7. Proper patient positioning
   • Places patient in correct position for each required view

8. Central ray proper alignment to part
   • Central ray enters and exits desired part of interest

9. Central ray proper alignment with image receptor
   • X-ray tube and wall bucky/table bucky are in alignment
   • Properly position image receptor, either transversely or longitudinally, for procedure of projection being performed according to departmental procedure or patient needs

10. Proper SID
    • Ensures that proper SID is utilized for the study

11. Proper tube angulation and direction
    • Proper direction and degree of angulation (as per departmental requirements)

12. Appropriate field of view or collimation
    • Selects the proper field of view size for desired study
    • Selects proper image receptor size for desired study
    • Collimates to anatomical part of interest
    • Evidence of collimation is displayed on all studies when it does not interfere with diagnostic quality of study

13. Appropriate marker selection and placement
    • Places primary markers on the image so that they are visible while not interfering with required anatomy
    • In digital imaging, secondary markers may be used per department protocol

14. Appropriate exposure factors selected
    • Selects proper exposure factors: mA, time, kVp, focal spot, and back-up time (automatic exposure control)
    • Utilizes a technique that produces the highest quality radiograph while using the lowest possible dose. (NOTE: Exposure defects due to equipment malfunction does not deduct
from the student's score.)

15. Proper operation of equipment
   • Shows knowledge of equipment operation and functions

16. Practices proper radiation safety measures
   • Uses lead aprons, gonadal shielding (as applicable), and other types of protective devices
   • The student must wear radiation protection on portable and surgical procedures
   • The student must protect other staff members, family members, and general public as required
   • Door to radiographic room is kept closed during exposures
   • Questions the patient about the possibility of pregnancy

17. Shows knowledge of related anatomy on radiographs
   • Student must be able to identify anatomy on radiograph

18. Display awareness of how to improve image quality
   • Student is able to evaluate the images and articulate methods of improving the overall quality of study (when applicable). i.e. Positioning/Exposure Factors

19. Display of processed radiographs
   • Displays images on the viewing device/monitor per department protocol

20. Completes exam in a timely manner
   • Exam is completed in an appropriate length of time

21. Radiographic study is of diagnostic quality
   • Overall quality meets the expected standards (per department) to be considered a diagnostic radiographic study
Gonadal Shielding
The JRCERT has concluded that routine use of gonadal shielding for abdominopelvic radiography exams should not be standard practice for clinical radiography students when the use of such could interfere with the diagnostic quality of the exam and may result in the risk of a repeat exposure.

Students are educated about the importance of proper shielding as well as other factors to reduce patient dose.

More info can be found in the JRCERT Gonadal Shielding Position Statement.

Faculty Evaluation on Clinical Site Visits
Frequent constructive feedback is an important part of successful clinical course completion and progression in the program. Constructive feedback that is provided in a timely manner helps students master the skills needed to become a clinically competent radiographer. Site visits are scheduled each month to allow the AS in Radiography Program Coordinator(s) to evaluate students’ clinical progress. Progress is documented with a student performance evaluation. The number of evaluations received by the student will depend on the Clinical Coordinator(s) site visits, student rotations and availability of patient exams during visitations. The student performance evaluation is for information purposes only, and not a part of the student’s grade. The Clinical preceptor may use this evaluation in determining the students’ mid-term and end of semester evaluation. Please see Appendix I for the Clinical Progress Form.

Attendance
Please see program specific policies on attendance for labs, clinicals and didactic education. Students are required to attend class, clinical, lab, and other activities throughout the program. These policies can be found electronically on the IUSB website: https://healthscience.iusb.edu/radiography/student-resources.html

Trajecsys: Time Tracking
Students must use Trajecsys for documenting arrival/departures times on a designated computer at their clinical site or with their mobile device. Trajecsys is a cloud-based program that is managed through the Internet where students will use the system to record clinic time on an electronic timesheet. All records are kept online and can only be seen by the student and faculty (this includes Clinical Preceptors).

All efforts should be made to use Trajecsys at the student’s affiliated site. If a time error occurs and the student is unable to clock in/out, the Clinical Coordinator or the Director must be notified immediately; designated computers have an assigned IP address which differs from personal devices. Students must allow location on their device when using Trajecsys to validate area of clocking in or out. In the event Trajecsys is experiencing difficulty, the student will email the clinical coordinator immediately.

Funerals
Students are permitted three (3) days of bereavement (includes didactic and clinical days) leave for immediate family. Immediate family includes: great/grandmother & grandfather, grandmother, grandfather, mother, father, in-laws, legal guardians, siblings, spouses, partners and (1) day bereavement for friends, aunts, uncles, nieces, and nephews. If additional time is needed, please seek approval from the program director. Students may be asked to verify their absence by providing the clinical preceptor with documentation.
Conference Attendance
Students are required to participate in educational conferences while enrolled in the program. Time off from clinic will be considered excused and will not require the student to make-up lost time. The ISRT and RSNA one-day conference is mandatory. Both conferences are held in the fall semester of a student’s senior year.

Snow Days/Inclement Weather/Campus Closure
When inclement weather forces the closure of the campus of IU South Bend, all students are released from clinic. When a campus closure occurs during a Saturday or Sunday, students are not required to attend their scheduled Saturday or Sunday rotation. If a student is in clinic and IU South Bend announces that it will close, they will be dismissed from clinic at that time. All students must leave clinic. Students who decide to stay in clinic are doing so on a voluntary basis and will not be accruing hours for that time. Students are not required to make-up lost clinical time due to school closures. School closures are generally announced via the local news and through IUSB.

Employment Orientation
In the event a student has a work-related orientation and/or interview at a healthcare facility, the student will be required to make up any missed clinical hours if personal time is not used. The student can decide to either use personal time or make-up the missed hours.

Jury Duty
Students called for jury duty will be excused from clinical and/or didactic classes. In the event that it lasts longer than 3 days, students may be required to make-up missed course work and clinical time at the discretion of the program director. In the event that the student misses an abundance of clinical and didactic work, progression to the next semester may be affected.

Sports or Other Campus Related Events
If the student participates in a university sport or campus related event, the student will have to make-up the hours. The program will work with students so they can attend the event, but this must be communicated with faculty as soon as possible in writing.

Semester Breaks
Students will receive all IU South Bend time-off (breaks, holidays, etc.). For 1st year students, Clinical Experience will be held throughout Summer Sessions I and II.

Clinical Experience during Semester Breaks
Students are not permitted to attend Clinical Experience when the university is closed.

Clinical Experience Assignment
Students are scheduled and rotated through various clinical areas as scheduled by the clinical coordinators. Students are required to attend all clinical assignments as scheduled and are not permitted to alter any posted schedule. Students should not leave their assigned clinical area without the approval of the clinical preceptor or supervising staff technologist. Students should contact the clinical preceptor and clinical coordinator if a problem with scheduling arises.

Breaks in Clinic
Students may go on a fifteen (15) minute break in the morning and afternoon; students should get approval from the supervising staff technologist prior to leaving their assigned area. Students should not leave the clinical site campus for breaks; students are not required to punch out for breaks.
Lunch Break
The student is allowed a thirty (30) minute lunch break. The time of the lunch break should be
coordinated with the assigned technologist and the scheduled course work. Students are not required to
punch out for lunch unless they are leaving hospital grounds, in that case you will need to punch out/in.

Slow Periods
When the assigned clinical education area is not busy and patient flow is slow, the student should remain
near their assigned area. During slow periods, the student may practice radiographic positioning, attend to
linens, disinfect equipment, study in that area, etc. Students may also use this time to study schoolwork; however, students should not be on personal electronic devices or hospital computers to complete
schoolwork during this time. Students should also contact the clinical preceptor who may grant them
permission to leave their assigned clinical area.

Tobacco Products
Smoking, vaping, and chewing tobacco in the clinical setting is prohibited. If excessive odor from
smoking is noticeable and considered offensive, faculty and clinical preceptors have the right to request
that a student be sent home to change scrubs. Any missed clinical time must be made up prior to the end
of the semester.

Military Leave
Students that are serving in the military have an allotted number of clinical days to use for their service.
Please see the R-22 Military Policy for more information.

Miscellaneous Clinical Information
Transporting Patients
Students should not transport house patients to the patient floors. Students may transport patients to/from
the Emergency Department and/or other modalities provided it is on the same floor.

Storage of Student Personal Equipment at Clinical Education Site
Storage areas are provided at each students assigned clinical site for storing personal belongings (lunches,
textbooks, book bags, cellphones, etc.). Students should bring locks to secure belongings. Items should be
stored in designated areas during clinical hours and should not be kept in common areas where they might be
considered in the way of hospital workflow. Please be considerate and store items in the designated
area away from direct patient care areas.

Student Bulletin Board
All clinical sites maintain a student communication area or bulletin board. Students are asked to check
the bulletin board regularly. Notices will inform students of classroom and clinical schedules and
administrative announcements. Student bulletin boards are in designated areas in the imaging department.
Clinical Course Descriptions

Clinical Experience I, AHLT-R181, Semester I: Fall, 2 Cr. Hrs., Second 8 Weeks
The student is oriented to clinicals by spending one week in PACS, transport, and the radiology office. Following the orientation period, rotations in General Radiography, Fluoroscopy, Emergency Room, evenings, affiliate sites, and Portables/Surgery are required. In a given week, there will be a combination of approximately 16 hours of clinicals.

Clinical Experience II, AHLT-R182, Semester II: Spring, 3 Cr. Hrs.
Rotations include Emergency Radiography, General Radiography, Fluoroscopy, Portables and Surgery, affiliate sites, weekend, and evenings are required. In a given week, there will be a combination of approximately 16 hours of clinicals.

Clinical Experience III and IV, AHLT-R281 and AHLT-R282, Semesters III & IV: Summer I & II, 3 Cr. Hrs.
Clinical rotations include General Radiography, Fluoroscopy, Portable Surgery, Emergency Radiography, affiliate sites, weekend(s), and evening rotations. The student will complete approximately 40 hours of clinical experience each week during Summer Session I and Summer Session II. A separate clinical education grade will be given for each summer session.

Clinical Experience V, AHLT- R283, Semester V: Fall, 4 Cr. Hrs.
Clinical rotation includes General Radiography, Emergency Radiography, Portable Surgery, Fluoroscopy, Evenings, CT, rotation of choice, weekend(s), and affiliate clinical site rotations. Rotation of choice include any diagnostic or modality of the student’s choosing. The student will complete approximately 24 hours of clinical experience each week.

Clinical Experience VI, AHLT-R290 Comprehensive Experience, Semester VI: Spring, 4 Cr. Hrs.
Clinical rotations include General Radiography, Emergency Radiography, Fluoroscopy, Portables/Surgery, Evenings, rotation of choice, weekend(s), and affiliate clinical site rotations. Rotation of choice include any diagnostic or modality of the student’s choosing. The student will complete approximately 24 hours of clinical experience each week.

Violations in Courses

Failure to follow course syllabi policy and handbook policy will result in course violations.

- The action taken by faculty depends on the violation and the frequency of offenses. This may impact course grade and/or progression in the program.
- The action taken by faculty depends what is outlined in the course syllabus. This follows the course policies found in course syllabi and students may also be put on a Program Level Success Plan.
- Course violations reset with each course.
- Students may receive more than 1 violation at a time.
- Actions and behaviors of students resulting in severe violations may result in immediate dismissal. The appropriate IU authorities will be notified.
• In some cases, the student may be asked to leave class, lab, or clinical setting and must report to the Program Director before returning to class, lab, or clinical. If the student refuses, security will be called to remove the student. This will result in immediate dismissal from the program.
Clinical Assignments
Clinical assignments are scheduled each semester throughout the program. Below is a table representing the different rotations and the amount of weeks required. These rotations are considered mandatory and a failure to complete these rotations will result in an incomplete. If students need special accommodations, the student should contact the program director.

Rotation of choice weeks include: Any diagnostic rotation at EGH, Memorial, Mish, Plymouth, KCH, Goshen | Lighthouse, Ireland Road,

IUSB Radiography Clinic Schedule

Clinical hours are 8-hour days. In the fall semester, junior clinical days are part of orientation in AHLT-R103 and AHLT-R181, Clinical Practicum I. AHLT-R 181 is the second 8 weeks of the semester. Juniors are in clinical every Wednesday and Friday. Senior clinical days are part of AHLT-R283, Clinical Practicum V and students are in clinical on Monday, Tuesday, and Thursday.
  
In Fall 2023, junior students will complete an estimated 151 hours of clinical hours and senior students will complete an estimated 352 hours of clinical hours.

In the spring semester, junior clinical days are part of AHLT-R182, Clinical Practicum II. Juniors are in clinical every Wednesday and Friday. Senior clinical days are part of AHLT-R290 and they are in clinical on Monday, Tuesday, and Thursday.
  
In spring 2024, junior students will complete an estimated 248 hours of clinical hours and senior students will complete an estimated 348 hours of clinical hours.

Over the summer, junior students transition to senior students. The senior students graduate every May. Students are in clinical 40 hours per week, 5 days per week. Students are enrolled in AHLT-R281 and AHLT-R 282, Clinical Practicum III and IV.
  
In summer 2024, students will complete an estimated 224 hours in summer session I and 232 hours in summer session II.

Normal clinical hours are from 7:30 am to 4:00 pm. When students are on evening rotations, the scheduled hours are 1:30 pm to 10:00 pm. Weekend shifts are also a program requirement. Schedules are subject to change.

Evaluator comments regarding student's overall performance (may use back of page)

Scoring
A passing grade is above 85%. Anything below 85% (missing more than two categories) will require the student to complete the laboratory competency again. The student must demonstrate laboratory competency above 85% before practicing on patients with direct supervision.

☐ Approved  ☐ Not Approved  ☐ Simulated  ☐ Retest

INITIATIVE - Displays energy and motivation in starting and completing tasks
ATITUDE - Displays willingness to be guided, directed and instructed while displaying positive emotional and psychological traits
COMMUNICATION SKILLS - Interacts appropriately and professionally with patients, staff and physicians
PATIENT CARE SKILLS - Perceives patient needs creating a warm, friendly and comfortable experience
PROFESSIONALISM - Appearance and behavior consistent with rules and regulations of Indiana University of South Bend Program and its affiliates
QUANTITY OF WORK FOR CLASS STANDING - Participates in the total workload of the assigned clinical area, completing the appropriate volume of work
QUALITY OF WORK FOR CLASS STANDING - Demonstrates proper accuracy and thoroughness in procedure performance while maintaining standard of professionalism and patient care; practices appropriate radiation protection to patient and staff
ORGANIZATION - Performs duties in a logical and efficient manner
CRITICAL THINKING FOR CLASS STANDING - Development of analytical and problem-solving skills
ADAPTABILITY - Applies information and responsibilities regarding procedures, materials, equipment and techniques
SELF CONFIDENCE FOR CLASS STANDING - Displays maturity and confidence
DEPENDABILITY - Follows through with clinical responsibilities in a reliable conscientious manner
ACCOUNTABILITY - Routinely present and punctual in assigned clinical area

Student was supervised in keeping with program policy.
Repeat studies were performed in accordance with the program repeat policy.

Comments (mandatory):
(For example: What is something the student did or performed well during this rotation? What is something they can improve?)

Approved ☐ Not Approved ☐
Appendix D – Clinical Competency Evaluations

Please grade the student on the overall performance of the exam. For anything that is not acceptable, please comment below. Passing is above 90%. Below 90% requires a retest.

Comments:
Appendix H - General Patient Care Competency Requirements

The following is a list of the general competency requirements mandated by the ARRT. Documentation for these requirements are recorded in Trajecsys.

General Patient Care Procedures:

- CPR/BLS Certified
- Vital Signs:
  - Blood Pressure
  - Temperature
  - Pulse
  - Respiration
  - Pulse Oximetry
- Sterile and Medical Aseptic Technique
- Venipuncture
- Assisted Patient Transfer (e.g., Slider Board, Mechanical Lift, Gait Belt)
- Care of Patient Medical Equipment (e.g., Oxygen Tank, IV Tubing)
Appendix I - Clinical Progress Evaluation
AS in Radiography Program

Objective: Evaluate the student’s clinical progression by assessing the student’s patient care skills, critical thinking and mastery of radiographic procedures at the level that coincides with the student’s level of training in the radiography program. Provide any relevant comments related to the student’s clinical performance in the areas of professionalism, communication, clinical skills and critical thinking.
